**Action:** Informational

### Miscellaneous EMV PDL Updates

**Effective January 8, 2020** Heartland will make multiple configuration updates to the EMV Parameter Download system tables. POS systems connected to the Heartland EMV PDL system will receive the updates automatically.

The changes will remove CVM filtering by AID and will allow all certified CVMs particular to each device to be available on all AIDs. This change will replicate a change made to the certification region EMV PDL system.

Please contact Heartland with any questions.
