**Action:** Review/Action as needed

### Heartland Allen Data Center Migration

Heartland has initiated the relocation of the Heartland Allen Data Center, located at 900 Guardians Way, Allen, Texas, to the Global Payments Data Center located in Sandston, Virginia (Richmond). The new location, a Quality Technology Services (QTS) co-lo location, located at 6000 Technology Blvd, Sandston, VA 23150.

Beginning in Q3 2023, Heartland will be initiating the build of the infrastructure. Testing connectivity is anticipated to begin in Q4 2023 and following the usual holiday technology freeze period, will be ready for production migration in Q1 2024. The target date for migration completion is Q3 2024.

This migration will require modifications to both IP addresses and URLs used by client's POS and firewalls. We will update this PMB as more information becomes available.

Should questions/concerns arise regarding this notice or the migration, please reach out to your Heartland Account Representative.
